Dimensions (LxWxH)*: 69 x 4 x 35

LONDON STYLE SURROUND COLLECTION BY PALAZZETTI

Modern and elegant design, inspired by the metropolitan spirit of Britain's capital city, the hotbed of new trends.

The "London Style" is the life and soul of the new surround collection from the European leader in the hearth industry for wood burning fireplaces and stoves. Palazzetti "surrounds" the fire with a style that is abreast with the times, and ensures the most advanced technological solutions, setting the trend reflecting the modern tomorrow.

"London Style" represents the very essence of modernity. An innovative collection characterized by minimalism, and utilising unprecedented finishing materials: "Wenge quartzite" with grains that resemble the aesthetics of Wenge wood veins, that gives a warm and luxurious touch, while retaining all the practicality of granite (unalterable colours, non deformable by heat, scratch-resistant and easy maintenance). Wenge quartzite, an exclusive material further enhanced by the Palazzetti antiquing process: a technique that renders the material with the look and character of wood that you have to touch to dispel any doubts. The finishing that meets the eye, and the wonderful feel of warm wood, combined with inserts of the finest white Limestone marble, creating a refined and harmonious composition which elegantly frames the fireplace.

Aesthetics meets functionality, tomorrow meets today, in a choice of six surrounds that comprise a collection adaptable to contemporary furnishing needs, and confer an unusual touch of lightness to the ambience.

The London Style surround collection is available for Palazzetti's Ecomonoblock range of high efficiency factory-build fireplaces and for the most common gas fireplaces available on the market.

ECOMONOBLOCK

The beauty of a fireplace with the performance of a stove

The Ecomonoblock is a new line of a zero-clearance wood fireplaces, designed by Palazzetti, to provide the performance of a wood stove without renouncing to the beauty and the magical atmosphere of a real fireplace. Ecomonoblock has been specifically designed for the growing demand for high efficiency and reduced carbon emissions wood burning fireplaces.

The innovation of the Ecomonoblock is in the "sealed" combustion chamber, the usage of particular refractory material and the Palazzetti's Low Emission Technology.

- zero-clearance wood burning fireplace
- high efficiency, up to 80%
- air wash system for self clean glass
- available in four different sizes with multiple glass configurations: linear, rounded, corner and bay, for optimized view of the flame
- environmentally friendly thanks to the Palazzetti secondary burn system and new low emissions technology
- patented vdf adjustable damper valve that automatically adapts its position while the door slides up to prevent smoke back into the room
- firebox with cast iron floor lined with Magnofix®, Palazzetti proprietary high heat accumulation refractory material
- fully concealed ceramic glass door with smooth one-hand sliding motion
- fresh air intake
- optional forced air kit
